### REASONS FOR ALLOWANCE

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application on 10/05/06 after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08/29/2006 under 37 CFR 1.116 has been entered.

2. The following is an examiner's statement of reasons for allowance:

The allowability resides in the overall structure of the device as recited in sole independent claim 1, and at least in part, because claim 1, as amended, recites: "a thermal conductive spring element, being substantially U-shaped, having at least one spring leg being substantially linear". The aforementioned limitations in combination with all remaining limitations of claim 1, are believed to render the claim and all claims dependent therefrom patentable over the art of record. Applicant's arguments that "Daszkowski teaches a spring element that is not U-shaped and the spring leg (18', 20', 32) is S-shaped (rather than linear - as claimed)" have been found persuasive. For at least the aforementioned reasons, the structure expressly recited in claim 1 is believed to be different from that of Koichi ('754) modified by Daszkowski ('720).

None of the references cited during prosecution of the instant application, either taken alone or in combination, is believed to render the present invention unpatentable as claimed.
